# TetraX™

Need something exceptional to stand out from the crowd? Something very different to create a powerful signature effect. Lack that missing X factor? Then go to the extreme with the visually sensational TetraX<sup>™</sup>!

Light source

9x 40W RGBW LED multichips

**Light output** 5.300 lm (integrating sphere)

**Zoom range** 4° - 45°

# Effects

3x MCFE<sup>™</sup> Multi-coloured Flower Effects (patented), pixel control, continuous pan rotation

Developed from the immensely successful Tetra1<sup>™</sup>, the TetraX<sup>™</sup> adds dynamic pan movement with extremely highspeed continuous rotation, dramatically increasing sweeping effect possibilities of the fixture.

Generating an ultra-tight 4° beam from each of the 9 evenly spaced pixels, they combine to produce a bright, defined "sheet" of light, as desired by Lighting Designers. The homogenised beams and smooth 11:1 motorised zoom provide ultra-smooth washes out to 45°.

TetraX<sup>™</sup> sets itself apart by including three exclusive eye-catching Robe patented MCFE<sup>™</sup> - Multi-Coloured Flower Effect - emitting sharp, multi-coloured spikes of light, with variable speed and rotation direction control, to further increase the projection of charismatic in-air animations.

All-inclusive colour and dimming control are available via RGBW and CMY colour mixing modes; variable CCT of 2.700K - 8.000K; tungsten emulation simulating the red shift and thermal delay of tungsten lamps for whites from 2.700K - 4.200K; DataSwatch™ 237 pre-programmed colour library; L3™ Low Light Linearity dimming software for imperceptible fades to black.

An Epass™ Ethernet switch ensures sustained network connectivity. A wide range of protocols (sACN, Art-Net or Kling-Net) allows quick network installation and control from media servers, DMX, or the internal effects engine.

TetraX<sup>™</sup> - eXceeding the eXeptional
