

Cyber Arch™

Second generation of the Cyber Control software contains many new and improved features and functions, including support for both 32/64-bit computer versions, new Easy Stand Alone PRO software and newly designed hardware interfaces with more XLR connectors, SD Card data storage, real time clock and others.

Cyber Arch is using a new USB-DMX interface with one 512 DMX-out channel. Designed especially for architectural installations, it allows easy control of lighting within a variety of places such as homes, hotels, restaurants, fountains, gardens, and many more.

Technical Specification
